

Lithium-ion Battery Instructions

To charge:

1. The battery must be in the ON position when charging. The battery will not charge otherwise.
2. Plug the adapter into the wall and the DC connector into the battery.
3. The light on the adapter will be red when the battery is charging.
When the battery is fully charged, the light on the charger will turn green.

Charging time can take up to 8 hours depending on how depleted the battery is.
The battery has circuitry to prevent over-charging, over-discharging and short circuit.

Safety precautions:

- Only use the provided adapter to charge your battery.
- Do not attempt to open, disassemble or service battery pack.
- Do not strike, crush, throw or trample the battery.
- May explode if damaged or exposed to fire.

Storage:

- Regularly charge the battery when not in use, making sure it is always partially charged.
- Keep away from high temperatures and store in a cool, dry place.
- Keep out of reach of children and pets.

Disposal:

- Dispose according to local regulations. Do not discard in regular household waste.
- Do not dispose of in fire or water.
